

Automation Your Way

Automation Support Program: Roche Sample Prep Reagents and Workflows

Roche Sequencing Solutions allows you to **unlock the potential of every sample** by providing automation scripts and support for our Sample Prep Reagents and Workflows across a wide offering of third-party NGS liquid handling platforms.

Workflows supporting KAPA DNA and RNA Library Preparation Kits, KAPA Library Quantification Kits and KAPA Target Enrichment products that support the HyperCap and HyperPETE Workflows are **validated and optimized for automated, high-throughput NGS library construction**. Scripts are currently available for many NGS liquid handling platforms and are continuously being developed to accommodate other Roche sample prep reagents, workflows and liquid handling platforms. In addition, the necessary overage volumes in our kits enable automation-friendly workflows to advance your research.

Features

- **Validated and supported** automation scripts and workflows from Roche and third-party vendors
- **Streamlined and optimized** workflows for high-performance KAPA Library Prep and Target Enrichment reagents
- **Necessary overage volumes** in kits to enable automation-friendly workflows

Benefits Compared to Manual Workflows

- **Higher sample throughput**
- **Less hands-on time** for greater convenience of batch processing up to 96 samples
- **Greater reproducibility**
- **Improved process control**
- **Comparable performance**

Constantly evolving, efficient, and complete solutions
